TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

100.00 GENERAL PURPOSE AND AUTHORITY

Chapter 155-E of the New Hampshire Revised Statutes requires that, with several exceptions, all mining and excavation operations in the State obtain prior approval and permitting from the local municipality in which the operation is to occur. The purpose of the Statute is to minimize safety hazards created by open excavations; to safeguard the public health and welfare; to preserve our natural assets of soil, water, forests, and wildlife; to maintain aesthetic features of our environment; to prevent land and water pollution; and to promote soil stabilization.

200.00 DEFINITIONS

For the purpose of this ordinance, certain words, terms, or phrases shall have the meaning as stated in this section unless the context clearly indicates otherwise. Words in the present tense include the future, the singular includes the plural, and the plural includes the singular. Terms and words not defined in this ordinance shall have the meanings understood in common usage and as defined in standard American dictionaries.

Abutter. Any person whose property is located in New Hampshire and adjoins or is directly across the street or stream from the land under consideration by the local land use board. For purposes of receiving testimony only, and not for purposes of notification, the term "abutter" shall include any person who is able to demonstrate that his land will be directly affected by the proposal under consideration. For purposes of receipt of notification by a municipality of a local land use board hearing, in the case of an abutting property being under a condominium or other collective form of ownership, the term abutter means the officers of the collective or association, as defined in NH RSA 356-B:3, XXIII.

Application. A completed application for an excavation permit. An application shall not be considered complete until all of the Checklist for Excavation Site Plan Review items have been completed and accepted to the satisfaction of the Regulator, in addition to any other requirements of this regulation.

Commercial. Any use of any earth material for sale or resale on or off site of the excavation area. In addition, an excavation shall be considered commercial if earth materials are transported to other land whose ownership is different than the ownership of the land from which the earth was excavated. Excavations which use earth materials in the processing of other material such as, but not limited to, concrete, asphalt and other building materials shall be considered commercial.

Dimension Stone. Rock that is cut, shaped, or selected for use in blocks, slabs, sheets, or other construction units of specified shapes or sizes and used for external or interior parts of buildings, foundations, curbing, paving, flagging, bridges, revetments, or for other architectural or engineering purposes. Dimension stone includes quarry blocks from which sections of dimension stone are to be produced. Dimension stone does not include "Earth" as defined in these regulations and RSA 155-E:1, I.

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

Earth. Sand, gravel, rock, soil, or construction aggregate produced by quarrying, crushing or any other mining activity or such other naturally occurring unconsolidated materials that normally mask the bedrock, as defined in RSA 155-E:1.

Excavation. Land area that is used, or has been used, for commercial taking of earth, including all slopes, as defined in RSA 155-E:1.

Excavation site. Any area of contiguous land in common ownership upon which excavation takes place.

Excavation area. The area within an excavation site where excavation has occurred or is eligible to occur under the provisions of these regulations, The Lyndeborough Zoning Ordinance, and RSA 155-E.

Notice of Intent. A written notice to the Regulator and to the Conservation Commission to inform them of the intent to apply for a permit to excavate for a new excavation, or for expansion or continuation of an excavation in operation at the time of adoption of this regulation.

Regulator. The Lyndeborough Planning Board.

300.00 PERMIT REQUIRED

No owner shall permit any excavation of earth on their premises without first obtaining a permit. Excavations in operation at the time of adoption of this regulation shall have one year from the date of adoption of this regulation to file a completed application for a permit to excavate. Excavations that have not operated commercially within one year of the adoption of this regulation shall not continue to operate until a permit to excavate is issued by the Regulator. All excavations 1,000 cubic yards or greater shall require a permit except for the situations described below:

300.01 Existing Excavations

An excavation that lawfully existed as of August 24, 1979 from which earth material of sufficient weight or volume to be commercially useful has been removed during the 2-year period before August 24, 1979, may continue to excavate without a permit subject to:

- A. Such an excavation area shall be exempt from local zoning, provided that at the time the excavation first begun, it was in compliance with any local ordinances that may have been in effect.
- B. Such an excavation area may not be expanded beyond the limits of the Town in which it is situated and the area which, on August 24, 1979, and at all times subsequent thereto has been contiguous to and in common ownership with the excavation area of that date, and appraised and inventoried for property tax purposes as part of the same tract as the excavation site.
- C. Such an excavation shall be performed in compliance with the express operational and reclamation standards in NH RSA 155-E:4-a, NH RSA 155-E:5 and NH RSA 155-E:5-a.
- D. The owners or operators of any existing excavation area for which no permit has been obtained shall file an excavation report with the Regulator within one year of written notification by the

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

municipality. Any existing excavation that fails to file a report within one year shall obtain a permit from the Regulator before continuing excavation of the site. The report shall contain the following information:

1. The location of the excavation - tax map and lot number.
2. The date the excavation first began.
3. A description of the permissible limits of expansion.
4. An estimate of the area which has been excavated to date.
5. And an estimate of the amount of commercially viable earth materials still available on the parcel.

300.02 Abandoned Excavations

Any excavation, except for excavations or excavation sites described in NH RSA 155-E:2, III, for which the affected area has not been brought into complete compliance with the reclamation standards of this regulation (Sections 500.00 ADDITIONAL PERMIT REQUIREMENTS and 700.00 SITE RECLAMATION STANDARDS) shall be deemed abandoned if:

- A. No earth material of sufficient weight or volume to be commercially useful has been removed from the excavation site during any two year period; the owner or operator may, however, extend the period by submitting a reclamation time table to be approved by the regulator and posting a bond or other surety in a form and amount prescribed by the regulator sufficient to cover the costs of reclamation of the excavation site; or
- B. The excavation is in use and is not a stationary manufacturing plant, but does not conform with the incremental reclamation requirements of this regulation or the owner or operator has not posted a bond or other surety sufficient to cover the costs of reclamation; and submitted a reclamation timetable to be approved by the regulator; and
- C. The owner or operator of the excavation has neither secured a permit pursuant to this regulation nor filed a report of an existing excavation within the prescribed time period.
- D. The Regulator may order the owner of any land containing an abandoned excavation to either file a reclamation timetable to be approved by the regulator and bond or other surety, or to complete the reclamation in accordance with this regulation within a stated reasonable time. Failure to complete said reclamation within the prescribed time period may result in the regulator requesting the governing body to cause reclamation to be completed at the expense of the municipality. The municipality's costs shall constitute an assessment against the owner and shall create a lien against the real estate on which the excavation is located. Such assessment and lien may be enforced and collected in the same manner as provided for real estate taxes.

300.03 Stationary Manufacturing and Processing Plants

- A. Excavations from an excavation site contiguous to, or contiguous land in common ownership with, stationary manufacturing and processing plants in operation as of August 24, 1979 that use earth from said excavation site. Such excavations shall be performed in compliance with the express operational and reclamation standards contained in NH RSA 155-E:4-a, NH RSA 155-E:5 and NH

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

RSA 155-E:5-a. Loss of non-permit status shall be preceded by written notice from the regulator that the excavation is not in compliance and the owner shall have failed to bring such excavation into compliance within 30 days of receiving this notice.

- B. Excavations from a site that on August 4, 1989 was contiguous to, or was contiguous land in common ownership with, stationary manufacturing and processing plants which have been granted state or local permits since August 24, 1979, and before August 4, 1989 that use earth obtained from said site. The operation and reclamation of such areas shall be governed by the conditions of the state or local permit and any extensions or renewals thereof.

300.04 Highway Excavations

An excavation performed exclusively for the lawful construction, reconstruction, or maintenance of a class I, II, III, IV, or V highway by a unit of government that has jurisdiction for the highway, or an agent of the unit of government that has a contract for the construction, reconstruction, or maintenance of the highway, provided that:

- A. A copy of the pit agreement executed by the owner, the agent and the governmental unit shall be filed with and accepted by Regulator prior to the start of excavation; and such excavation shall not be exempt from the provisions of Sections 500.00 ADDITIONAL PERMIT REQUIREMENTS, 600.00 OPERATIONAL STANDARDS and 700.00 SITE RECLAMATION STANDARDS of these regulations, nor from any other land use regulations of the municipality. Failure to file a copy of the pit agreement with the municipality or to comply with the terms of the agreement constitutes a violation enforceable under the provisions of Section 1500.00 ENFORCEMENT of these regulations.
- B. The New Hampshire Department of Transportation or its agent may apply to the appeals board created under NH RSA 21-L to be exempted from the provisions of local land use regulations. The appeals process includes a formal public hearing in the affected municipality as set forth in NH RSA 155-E:2, IV-(c).
- C. The governmental unit or its agent must comply with the following:
 - 1. the excavation shall comply with the operational and reclamation standards of NH RSA 155-E:4-a, NH RSA 155-E:5 and NH RSA 155-e:5-a.
 - 2. Section 600.00 OPERATIONAL STANDARDS of these regulations.
 - 3. the excavation shall not be unduly hazardous or injurious to the public welfare.
 - 4. existing visual barriers in the areas specified in NH RSA 155-E:3, III shall not be removed, except to provide access to the excavation.
 - 5. the excavation shall not substantially damage a known aquifer, so designated by the United States Geological Survey; and
 - 6. all required permits for the excavation from state or federal agencies have been obtained.

300.05 Other Exceptions

- A. Excavation that is exclusively incidental to the lawful construction or alteration of a building or structure or the lawful construction or alteration of a parking lot or way including a driveway on

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

a portion of the premises where removal occurs. This excavation cannot be started, however, until all required state and local permits necessary for the construction or alteration of the building, structure, parking lot, or way have been issued.

- B. Excavation incidental to agricultural or silvicultural activities, normal landscaping, or minor topographical adjustment.
- C. Excavation from a granite quarry for the purpose of producing dimension stone, if such excavation requires a permit under NH RSA 12-E.
- D. A person owning land abutting a site that was taken by eminent domain, or by any other governmental taking, upon which construction is taking place may stockpile earth taken from the construction site and may remove the earth at a later date after written notification to the Regulator.

400.00 APPLICATION FOR PERMIT

Any owner or owner's designee subject to this chapter shall, prior to excavation of or continuance or expansion of excavation of any land, apply to the Regulator for a permit for excavation and submit a reclamation plan. The permit application shall be signed and dated by the applicant and shall contain at least the following information in addition to other regulation, checklist, and site plan review requirements. The Regulator may waive one or more of the items listed under this section.

- A. The name and address of the owner of the land to be excavated, the person who will do the excavating and all abutters to the premises on which the excavation is proposed.
- B. An Excavation Plan at a scale of no less than one inch equals one hundred feet (1":100') and showing the area to be excavated and the land falling within 200 feet of the perimeter of the area to be excavated. All plans submitted to the Regulator shall comply with the provisions for erosion and storm water control set forth in Section 750.00 of the Lyndeborough Subdivision Regulations. All plans submitted shall be of a quality that they are easily understood and of an accuracy that compliance can easily be checked. At least six (6) copies of final plans shall be filed with the Regulator prior to issuance of a permit.

400.01 Excavation Plan

The Excavation Plan shall include:

- A. Seal or signature of an engineer/land surveyor licensed in the State of New Hampshire.
- B. Existing topography at contour intervals of five or fewer feet, based on mean sea level.
- C. The breadth, depth and slope of the proposed excavation, and existing excavation where applicable, and the estimated duration of the excavation.
- D. Wooded and heavily vegetated areas.
- E. All surface drainage patterns including wetlands and standing water.
- F. Location of all easements, on or below the ground.
- G. Location and width of all public roads and rights-of way.

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

- H. A log of borings or test pits that extend to either the seasonal high-water table, ledge, or a minimum of six feet below the maximum proposed excavation depth, including location and soils data.
- I. Location and extent of any stone walls, ledge outcroppings, wells, existing buildings, septic systems, utilities, and the like.
- J. A locus map, at a scale of one inch equals one thousand feet (1":1000'), showing the proposed operation in relation to existing roads.
- K. Any existing and all proposed excavation areas.
- L. Any existing and all accessory facilities/activities.
- M. Any existing and proposed access roads, including width and surface materials.
- N. Any existing and proposed parking areas.
- O. Any existing and proposed fencing, buffers or visual barriers, including height and materials.
- P. Storage areas for topsoil to be used in reclamation.
- Q. All measures to control erosion, sedimentation, water pollution, air pollution, and hazards to human safety.
- R. The location of existing buildings, structures, septic systems, and wells within 150 feet of the property boundary.
- S. The location of all driveways and road intersections within 200 feet of the property boundary; and
- T. Copies of any permits required by state or federal regulations.

400.02 Reclamation Plan

A Reclamation Plan shall be at the same scale as the Excavation Plan and cover the same area. All plans submitted to the Regulator shall comply with the provisions for erosion and storm water control set forth in Section 750.00 of the Lyndeborough Subdivision Regulations. All plans submitted shall be of a quality that they are easily understood and of an accuracy that compliance can easily be checked. At least six copies of final plans shall be filed with the Regulator prior to issuance of a permit. The Reclamation Plan shall include:

- A. Seal and signature of an engineer/land surveyor licensed in the State of New Hampshire.
- B. All boundaries of the area proposed for reclamation.
- C. Final topography of the area proposed for reclamation.
- D. Final surface drainage pattern, including the location and physical characteristics of all artificial and/or modified drainage facilities.
- E. Schedule of final reclamation activities including seeding mixtures, cover vegetation, fertilizer types, and rates.
- F. Photographs of the site before excavation (from at least two different vantage points); and
- G. Subsequent use of the site, if known or anticipated.

500.00 ADDITIONAL PERMIT REQUIREMENTS

500.01 Size and Time Limit on New Excavations.

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

No excavation of a new area shall exceed five acres in size at any one time. In addition, the size of the area for any permitted excavation shall not exceed that area which can be reclaimed according to the approved application within a one-year period.

If reclamation of the site is not completed within the one-year permit period, the Town may declare part or all the bond forfeit, and use these monies to reclaim the site, in addition to the requirements of 1300.00 (Issuance of Permit). At no time shall more than one permit be allowed on a lot of record.

500.02 Size and Time Limit on Expansions.

No expansion and reclamation of an excavation shall exceed the already disturbed area of the existing excavation plus five acres. However, the entire excavation area shall not exceed that area which can be reclaimed according to the approved application within a one-year period. If an excavation operating at the time of adoption of this regulation cannot be reclaimed within one year, no additional new excavation into an undisturbed area shall be permitted until the existing excavated area is reclaimed based on an approved permit as required by this regulation. In the case of an excavation in operation at the time of adoption of this ordinance that is not being expanded, the permit period allowed for reclamation shall also be one (1) year.

If reclamation of the site is not completed within the one (1) year permit period the Town may declare part or all of the bond forfeit, and use these monies to reclaim the site, in addition to the requirements of Section 1200.00 ISSUANCE OF PERMIT. At no time shall more than one permit be allowed on a lot of record.

500.03 Non-Conforming Sites.

Expansion of any site used for sand and gravel excavation is limited to such activities which are considered a permitted or allowed use in the corresponding zoning districts. When an excavation is not allowed by local zoning or similar ordinances regulating the location of the excavation site in effect on the effective date of this section, expansion may be restricted or modified with conditions by order of the Planning Board if after notice to the owner and a public hearing the board finds that such expansion will have a substantially different and adverse impact on the neighborhood.

500.04 Hours of Operation.

The hours of operation shall be determined by the Regulator during the permit process. The level of operation and the type of neighborhood affected shall be considered by the Regulator In establishing these hours.

500.05 Hauling Information.

Hauling information, including routes to be utilized, the type and weight of motor vehicles involved, and the frequency and schedule of operations of such vehicles shall be provided to the Regulator prior to the issuance of an Excavation Permit. The Regulator may require modifications to such plans and/or may

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

place conditions upon such operations, depending on surrounding land uses and road conditions. The Regulator reserves the right to conduct a traffic study at the applicant's expense to ensure that public safety, neighborhood compatibility and road capacity and condition have been considered and optimized in the hauling plan.

600.00 OPERATIONAL STANDARDS

It shall be a violation of these regulations for any person to excavate, or for any owner to permit excavation on their excavation site, when such excavation is subject to a permit under these regulations and pursuant RSA 155-E:2, without complying with the following minimum standards:

- A. No excavation shall be permitted below road level within 50 feet of the right of way of any public highway as defined in RSA 229:1 unless such excavation is for the purpose of said highway.
- B. No excavation shall be permitted within 50 feet of the boundary of a disapproving abutter, within 150 feet of any dwelling which either existed or for which a building permit has been issued at the time the excavation commenced.
 - 1. No excavation shall be permitted within 75 feet of any great pond, navigable river, or any other standing body of water 10 acres or more in area or within 25 feet of any other stream, river or brook which normally flows throughout the year, or any naturally occurring standing body of water less than 10 acres, prime wetland as designated in accordance with RSA 482-A:15, I or any other wetland greater than 5 acres in area as defined by the New Hampshire Department of Environmental Services.
- C. Vegetation shall be maintained or provided within the peripheral areas required by paragraphs A and B.
 - 1. Natural vegetation adjacent to neighboring properties on which excavation is not intended shall be maintained for the purposes of erosion control, screening, noise reduction, and property valuation.
- D. Drainage shall be maintained to prevent the accumulation of free-standing water for prolonged periods. Excavation practices which result in continued siltation of surface waters or any degradation of water quality of any public or private water supplies are prohibited.
 - 1. Appropriate erosion, sedimentation, air, and water quality measures shall be integrated into the excavation process. Excavations shall comply with the provisions for erosion and storm water control set forth in Section 750.00 of the Lyndeborough Subdivision Regulations.
- E. No fuels, lubricants, or other toxic or polluting materials shall be stored on-site unless in compliance with state laws or rules pertaining to such materials.
- F. Where temporary slopes will exceed a grade of 1:1, a fence or other suitable barricade shall be erected to warn of danger or limit access to the site.
- G. Prior to the removal of topsoil or other overburden material from any land area that has not yet been excavated, the excavator shall file a reclamation bond or other security as prescribed by the regulator, sufficient to secure the reclamation of the land area to be excavated.
- H. Topsoil shall be stripped from the excavation area and stockpiled for use in subsequent reclamation of the site.

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

- I. No actual excavation is to exceed five (5) acres at one time unless specifically authorized by the Regulator.
- J. Nothing in these regulations shall be deemed to supersede or preempt applicable environmental standards or permit requirements contained in other state laws, and no exemption under these regulations shall be construed as an exemption from any other state statute.
- K. No excavation shall be permitted so close to the seasonal high-water table or to bedrock (as indicated by the required borings or test pits) as would preclude the subsequent re-use of the site in accordance with existing public health standards, local zoning, and local master plan.
- L. All temporary structures required during excavation operations shall be removed from the site within thirty (30) days after such operations cease.
- M. All vehicles transporting excavated material shall utilize adequate covering and/or sideboards to prevent dust and spillage when loaded.

700.00 SITE RECLAMATION STANDARDS

The Regulator or its designee shall periodically inspect the operations and shall perform a final reclamation inspection to ensure that the approved plans have been followed. All inspection costs shall be covered by the applicant.

- A. No slope in soil material shall be left steeper than 3:1 (three horizontal feet for each one foot of vertical drop) unless it can be demonstrated by the applicant that a steeper grade can be adequately vegetated and stabilized. Under no circumstances shall a soil material slope be left steeper than 2:1.
- B. All debris, stumps, boulders, etc. shall be lawfully disposed of in a manner acceptable to the Regulator or its designee.
- C. Ground levels and grades shall be established as shown on the approved reclamation plan as soon as practical after-site excavation has been completed, but no later than one year.
- D. Stockpiled topsoil shall be spread over the disturbed area to a depth to allow and maintain vegetation. Areas posing the most critical problems for re-vegetation shall be given first priority should available topsoil be limited. The disturbed area(s) shall be fertilized, if necessary, and seeded with a grass or grass-legume mixture.
- E. If deemed necessary by the Regulator, suitable trees or shrubs may be planted in order to provide screening and natural beauty and to aid in erosion control. Such planted areas shall be protected from erosion during an appropriate establishment period by mulch and structural erosion control devices.
- F. Upon completion of the reclamation operations, the topography of the land shall be left so that water draining from the site leaves the property at the original, natural drainage points and in the natural proportions of flow.
- G. The party responsible shall not be released from its performance commitment (reclamation bond) until the Regulator certifies compliance with all terms of the Excavation Plan and the Reclamation Plan.
- H. Except for excavation sites of operating stationary manufacturing plants, any excavated area of 5 contiguous acres or more, which is depleted of commercial earth materials, excluding bedrock, or

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

any excavation from which no earth materials of sufficient weight or volume to be commercially useful have been removed for a one-year period, shall be reclaimed in accordance with Section 600.00 OPERATIONAL STANDARDS within one year. Each operator shall submit a reclamation plan and timetable.

800.00 PROHIBITED PROJECTS

The Regulator shall not grant a permit:

- A. Where the excavation would violate the operational standards of Section 600.00 OPERATIONAL STANDARDS.
- B. For an excavation within 50 feet of the boundary of a disapproving abutter or within 10 feet of the boundary of an approving abutter unless approval of a lesser distance is requested by said abutter.
- C. Where the issuance of the permit would be unduly hazardous or injurious to the public welfare.
- D. Where existing visual barriers would be removed, except to provide access to the excavation.
- E. Where the excavation would substantially damage a known aquifer, so designated by the United States Geological Survey.
- F. For excavation within 150 feet of an existing dwelling or to a dwelling for which a building permit has been issued at the time the excavation is begun.
- G. When the excavation requires land use permits from state or federal agencies; but the regulator may approve the application when all the necessary permits have been obtained.
- H. Where the project cannot comply with the reclamation provisions of Sections 600.00 OPERATIONAL STANDARDS and 700.00 SITE RECLAMATION STANDARDS.
- I. Where the excavation is not permitted by zoning or other applicable ordinance.

900.00 WAIVERS

The Regulator, upon application and following a hearing, may grant a waiver in writing, to the standards contained in Sections 500.00 ADDITIONAL PERMIT REQUIREMENTS, 600.00 OPERATIONAL STANDARDS and 700.00 SITE RECLAMATION STANDARDS for good cause shown. The written decision shall state specifically what standards, if any, are being relaxed and include reasonable alternative conditions.

1000.00 APPLICATION FOR AMENDMENT

When the scope of a project for which an excavation permit has been issued is proposed to be altered so as to affect either the size or location of the excavation, the rate of removal or the plan for reclamation, the owner shall submit an application for amendment of his excavation permit. The amended application shall be subject to approval in the same manner as provided for an excavation permit. An application for amendment to increase the size of a permitted excavation may be allowed if at least one-half of the area covered by the prior permit is reclaimed in accordance with the approved site Reclamation Plan.

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

1100.00 HEARING

Prior to the Regulator approving an application for an excavation permit or in application for an amended excavation permit, a public hearing shall be held within 30 days on such application. A notice of said hearing shall be sent to all abutters and shall specify the grounds for the hearing as well as the date, time, place, and at least 14 days' notice of the time and place of such hearing shall be published in a paper of general circulation in the town and legal notice thereof shall also be posted in at least two (2) public places within the town and on the town website. The 14 days shall not include the day of publication or the day of the meeting, but shall include any Saturdays, Sundays, and legal holidays within said period. Within twenty (20) days of said hearing or any continuation thereof, the Planning Board shall tender a decision approving or disapproving the application, giving reasons for disapproval.

1200.00 ISSUANCE OF PERMIT

If the Regulator, after public hearing, approves the application for a permit and determines it is not prohibited by Section 800.00 **PROHIBITED PROJECTS**, it shall grant the excavation permit upon receipt of an excavation application fee in accordance with the Lyndeborough Land Use Fee Schedule, and the posting of a bond or other surety with the municipal treasurer in the amount determined by the Regulator to be sufficient to guarantee compliance with the permit. The performance bond or other surety shall be for a period of 3 years. A copy of the permit shall be prominently posted at the excavation site and the principal access thereto. A permit shall not be assigned or transferable without the prior written consent of the Regulator. A permit shall specify the date upon which it expires.

The Regulator may include in a permit such reasonable conditions as are consistent with the purpose of this regulation including the provision of visual barriers to the excavation. In addition, a permit fee in an amount determined by the Regulator for application plan review and annual compliance review, by the Regulator or its designated agent, shall be assessed the applicant prior to issuance of a permit. This permit fee shall also include sufficient funds for the municipality's designated engineer or other agents of the Regulator to periodically conduct field reviews at the excavation site to ensure compliance with the approved excavation and reclamation plans.

1300.00 WITHDRAWAL OF PERMIT

A permit to excavate is automatically withdrawn if no substantial work is done on the site for a period of three years. Reclamation of areas already worked is mandatory.

1400.00 APPEAL

If the Regulator disapproves or approves an application for an excavation permit or an application for an amended permit, any interested person affected by such decision may appeal to the Regulator for a rehearing on such decision or any matter determined thereby. The motion for rehearing shall fully specify every ground upon which it is alleged that the decision or order complained of is unlawful or unreasonable and said appeal shall be filed within 10 days of the date of decision appealed from. The Regulator shall

TOWN OF LYNDEBOROUGH
EXCAVATION SITE PLAN REVIEW REGULATIONS

either grant or deny the request for rehearing within 10 days, and if the request is granted, a rehearing shall be scheduled within 30 days. Any person affected by the Regulator's decision on a motion for rehearing may appeal in accordance with the procedures specified in RSA 677.

1500.00 ENFORCEMENT

The Regulator or a duly authorized agent may suspend or revoke the permit of any person who has violated any provision of his permit or this regulation or made a material misstatement in the application upon which his permit was granted. Such suspension or revocation shall be subject to a motion for rehearing thereon and appeal in accordance with Section 1400.00 APPEAL. Failure to file for a permit as required by this regulation shall be considered a violation subject to the enforcement provisions of this regulation.

Fines, penalties, and remedies for violations of this regulation shall be the same as for violations of RSA 676:15 and RSA 676:17.

To ascertain if there is compliance with this regulation, a permit issued hereunder or an order issued hereunder, the Regulator or its duly authorized agent(s) may enter upon any land on which there is reason to believe an excavation is being conducted or has been conducted since the effective date of this regulation.

Whoever violates any provision of this regulation, a permit issued hereunder, or a valid order issued Thereunder, shall be guilty of a misdemeanor.

Operators who fail to file for a permit will be issued a cease-and-desist order.

1600.00 SEPARABILITY

The invalidity of any provisions of this regulation shall not affect the validity of any other provision.

1700.00 FILING FEES

An application fee shall be submitted by all applicants as part of the preliminary excavation site plan submission requirements. The fee shall be submitted prior to any action by the Board to approve or disapprove the completed application. In addition to this fee, the applicant shall reimburse the Board for the expense of certified letters for abutter notification as well as the public hearing notification (see Lyndeborough Fee Schedule).

In addition, the applicant shall reimburse the Board for any expense which the Board may incur in reviewing the proposed excavation including, but not limited to, legal, engineering, surveying or other.
